Subject: Application for Full Stack Developer - TS Clearance Required (Requisition Code: 194403)

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the Full Stack Developer position at Deloitte. With my 4+ years of experience in software engineering, including significant experience with React, Python, and REST APIs within a Linux environment, combined with my active Secret security clearance to enable a smoother update to Top Secret, I am confident that I possess the technical skills and dedication to excel in this role and contribute significantly to your team's success.

In my current role at Marine Corps Community Services (MCCS) as a Junior Software Developer, I have been instrumental in accelerating the migration from a legacy Perl application to a modern Python/FastAPI stack. This involved mastering the existing legacy technology and collaborating closely with business analysts and external contractors to ensure a seamless transition. I also led a cross-functional team to resolve a critical data integration issue, demonstrating my ability to diagnose complex problems and implement effective solutions. This experience aligns perfectly with your requirements.

My previous experience at Revature further solidifies my expertise in full-stack development. I successfully migrated over one million records between Pega applications, utilizing Python, Power BI, and advanced Excel, ensuring data integrity and comprehensive documentation. I also developed and deployed enterprise applications using Java, Spring Boot, and Angular, demonstrating my ability to work with diverse technologies and deliver high-quality solutions. In addition, I have hands-on experience with Docker for containerization and Jupyter Notebook for data analysis and exploration, skills that would be valuable in developing and maintaining your search and analytics platform.

I am particularly drawn to Deloitte's commitment to innovation and its focus on solving complex challenges for government and public services clients. My experience working with government contracts at MCCS and my active Secret security clearance make me uniquely positioned to contribute to your mission-critical projects. I am eager to leverage my skills and experience to help your team deliver impactful solutions.

I am available to work onsite three days a week, as required, and am prepared to travel 10-20% as needed. My resume, attached for your review, provides further details on my qualifications and accomplishments. I am eager to learn more about this exciting opportunity and discuss how my skills and experience can contribute to Deloitte's continued success.

Thank you for your time and consideration.

Sincerely,

Jose Michael Rubio
