JPMorgan Chase & Co.
1750 Tysons Blvd
McLean, VA 22102

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer III - Front End/Full Stack position at JPMorgan Chase. With my background in full-stack development and experience working with AI/ML technologies, I am excited about the opportunity to contribute to JPMC's AI/ML Technology division.

In my current role as a Junior Software Developer at Marine Corps Community Services, I have demonstrated my ability to adapt quickly to new technologies while maintaining legacy systems. I've taken on leadership responsibilities during senior team absences, showcasing my capability to ensure project continuity and team performance – skills that align perfectly with JPMC's need for technical contributors who can think beyond conventional approaches.

My experience at Revature LLC involved collaborating with cross-functional teams to optimize user stories and working with business analysts to manage large-scale data migrations. This experience, combined with my proficiency in PyTorch and FastAPI, positions me well to contribute to JPMC's company-wide AI/ML/Data Platform development.

What particularly excites me about this role is the opportunity to work with both traditional AI/ML and Generative AI. I am currently advancing my skills in this area through PyTorch for Deep Learning at ZTM Academy, and I recently completed FastAPI certification, which will be valuable for developing and integrating AI/ML related Front-End and API capabilities.

As a bilingual professional fluent in English and Spanish, I bring additional value in terms of global collaboration and communication. My experience in creating accessible systems and pattern libraries, combined with my background in financial technology (as co-founder of FinTech at VCU), aligns well with JPMC's commitment to innovative financial solutions.

I am particularly drawn to JPMorgan Chase's emphasis on diversity, equity, and inclusion, and I am excited about the prospect of contributing to this culture while helping to build the next generation of AI/ML technologies in the financial sector.

Thank you for considering my application. I look forward to discussing how my skills and experience align with JPMorgan Chase's needs.

Best regards,

Jose Michael Rubio
