## EMPLOYMENT

### Marine Corps Community Services (MCCS)

Quantico, VA

#### Junior Software Developer

May 2023- Present

- Point of Contact and key contributor to the migration of legacy, on-premises Perl scripts to a modern AWS Cloud environment by proactively mastering legacy technology and collaborating with an interdisciplinary team of business analysts and contractors to ensure alignment and facilitate a smooth transition
- Led a cross-functional team comprising Business Analysts, external contractors, and Windows Administrators to resolve a critical data integration issue that hindered a key business process. Diagnosed the root cause as a Windows character limit within the full path filename, implemented a solution that restored data flow, and improved inter-departmental collaboration
- Nominated as the team's Contracting Officer Representative (COR), demonstrating trustworthiness, industry expertise, and the ability to manage key contractual relationships.
- Maintained and enhanced critical processes using Oracle SQL Developer (PL/SQL), Bash, Perl, and Python scripts
- Debugged and resolved issues by debugging existing code, implementing new code, and reprocessing data
- Generated comprehensive reports utilizing SQL and PL/SQL to provide stakeholders with actionable insights on key performance indicators
- Was always willing and able to take on more responsibility to ensure the success of the team and organization

### Revature LLC

Remote

#### Software Engineer

August 2021- December 2022

- Enhanced product backlog quality and sprint efficiency by collaborating with cross-functional teams to optimize user stories based on iterative client feedback
- Successfully migrated over one million records between Pega applications by partnering with a Business Analyst to map fields and employing Python, Power BI, and advanced Excel, ensuring data integrity and comprehensive documentation
- Developed and deployed enterprise applications to major corporations utilizing Java, Spring Boot, and Angular

### AMC Technology LLC

Remote

#### Software Engineering Intern

June 2020- August 2020

- Developed Salesforce CRM integrations using Angular (TypeScript) and C#, enhancing the functionality and connectivity of their CRM systems
- Improved data visualization capabilities for their Dynamics 365 CRM by designing and implementing Power BI dashboards, providing valuable insights from complex data sets
- Identified and presented a business opportunity to expand the client base into Latin America and Spain by leveraging bilingual proficiency to act as a technical interpreter

## EDUCATION

### George Mason University

Fairfax, VA

#### MS Computer Science Bridge Program via Graduate Certificate, Computing Foundation

Expected: December 2028

### Virginia Commonwealth University

Richmond, VA

#### Bachelor of Science: Business

December 2020
